# BLASTCHECK KIT

# Take Control of Your Blasting Operation

W Abrasives has designed a kit to monitor your operating mix in an accurate and simple process.

The Blastcheck Kit is a tool that will allow you to take a sample of your operating mix and determine the effectiveness of the blasting media.

## Kit Includes:

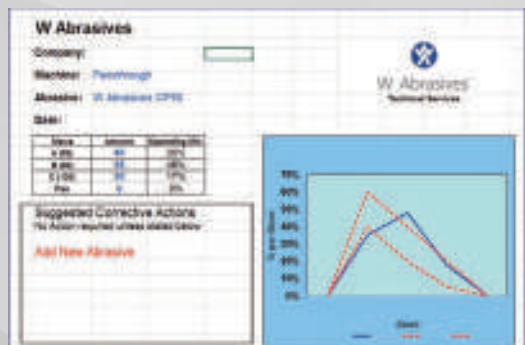

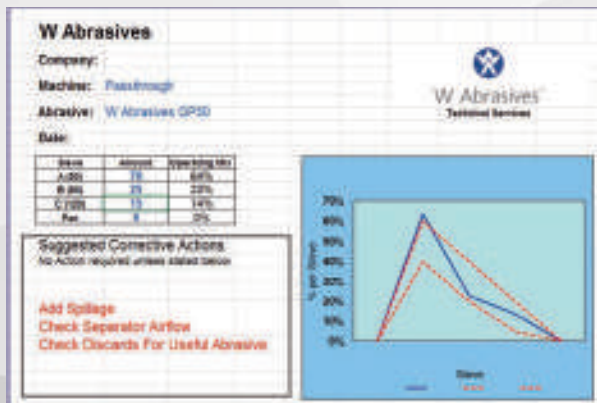

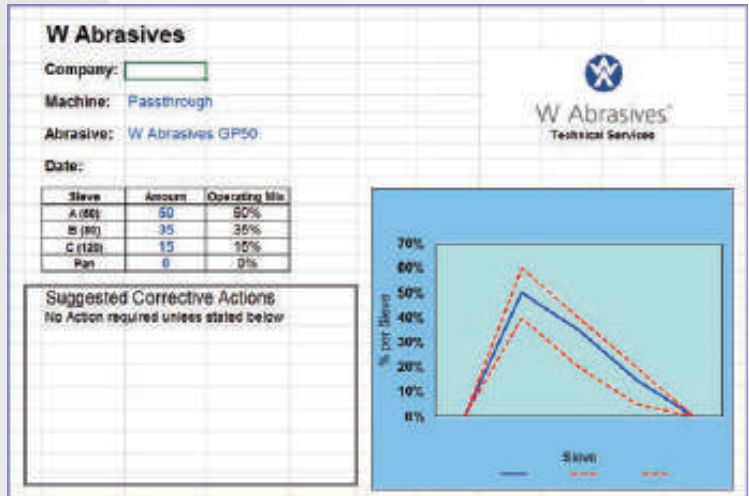

- Test sieves according to your material size
- Digital scale
- Wire brush
- USB with Blastcheck program
- Instructions for Blastcheck Kit use

# TESTING

## Use the Program

Optimize your operating mix by making adjustments from the program's Suggested Corrective Action.
